

ELMEC Differential Signal Balancer

ELMEC Corporation
President, CEO&CTO, Masaaki Kameya

ELMEC Technology of America
Vice President, COO, Ion Cenuse

Agenda

1. About Differential Signal Balancer (DSB)
2. Application Example : Printed Circuit Board Transmission
3. Application Example : Insert DSB before Transmission Line
4. Application Example : Insert DSB after Transmission Line
5. Conclusion
6. About us

<http://www.elmectech.com>

1. About Differential Signal Balancer (DSB)

Non-Magnetic common-mode filter for **5 G to 28 Gbit/s**

Application : Removing skew, tr/td-difference, EMI solution

Unbalanced Signal, 10 Gbit/s, skew 10 ps, tr/td= 15 ps/30 ps

Unbalanced Signal

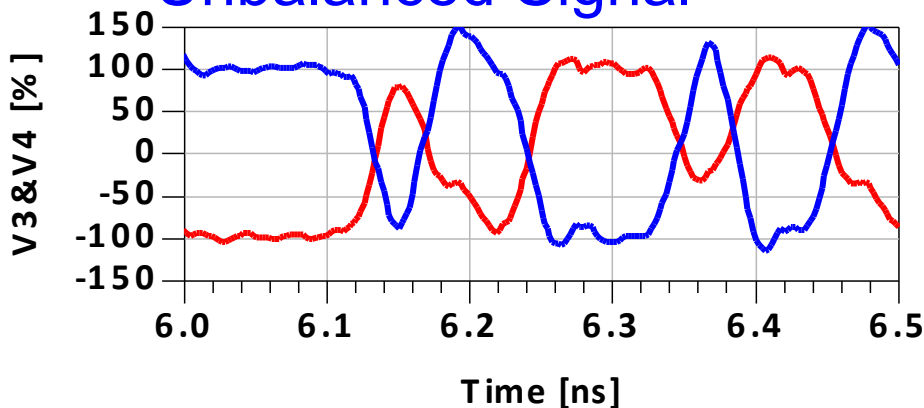

ELMEC DSB used

Unbalanced Signal, **28 Gbit/s**, skew 8 ps, tr/td= 10 ps/20 ps

Unbalanced Signal

ELMEC DSB used

1. About Differential Signal Balancer (DSB)

Load Map

CDLD Type
2 mm x 1.25 mm

Available Now

External Component
for Reference Board

Strong Noise Absorbing

New Product
0.8 mm x 0.6 mm
Two Metal Layers

External Component
Sample: 1Q-2017

Built into Interposer
IP Core: ~ 3Q-2016

New Product
0.1 mm x 0.1 mm
~ 0.2 mm x 0.2 mm
Four Metal Layers

Built into Silicon Die
IP Core: ~ 3Q-2016

2. Application Example : Printed Circuit Board Transmission

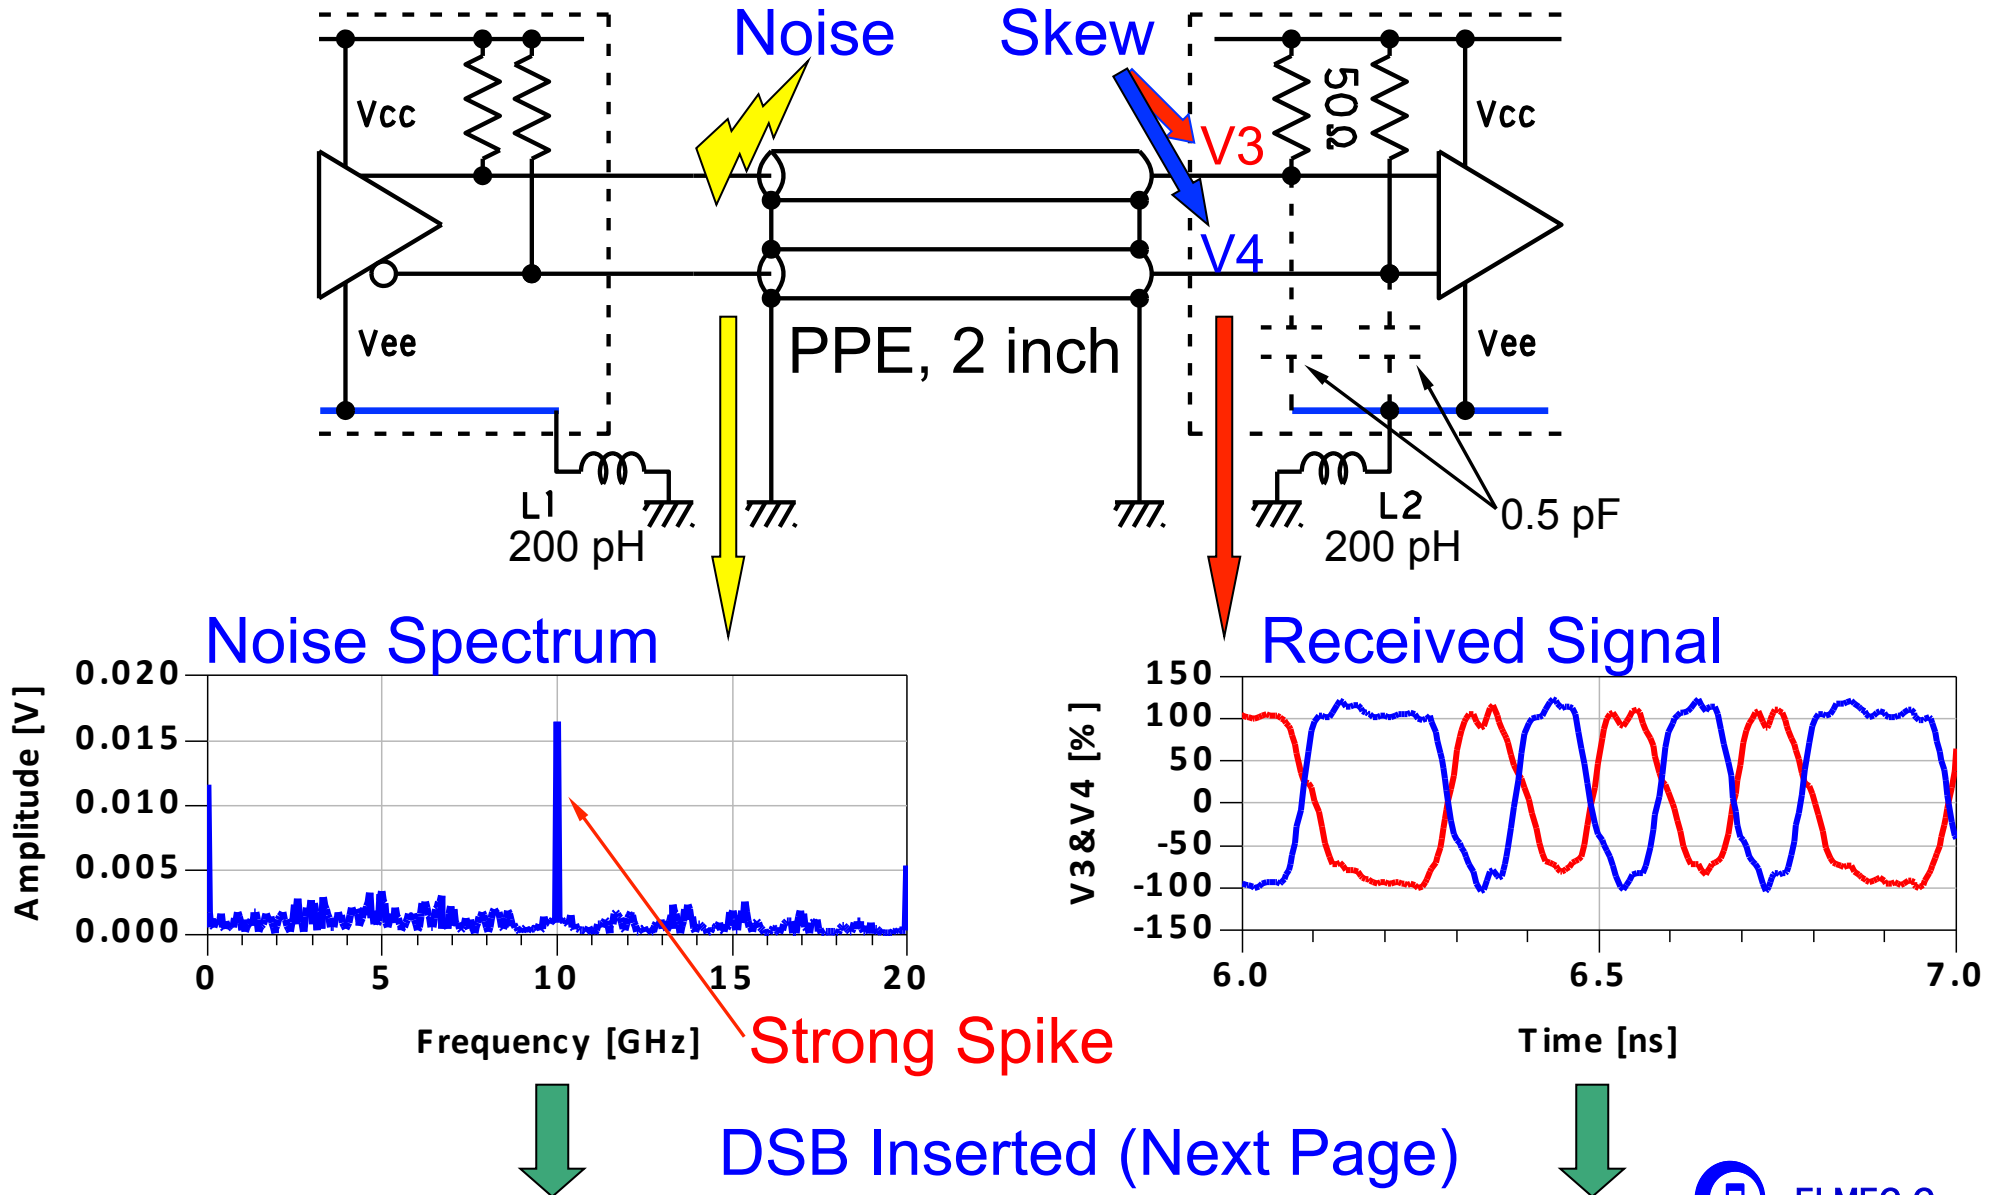

Equivalent Circuit with GND discontinuity

2. Application Example : Printed Circuit Board Transmission

Unbalanced Signal, 10 Gbit/s, skew 10 ps, tr/ta= 15 ps/30 ps

3. Application Example : Insert DSB before Transmission Line

CDLD30R Inserted

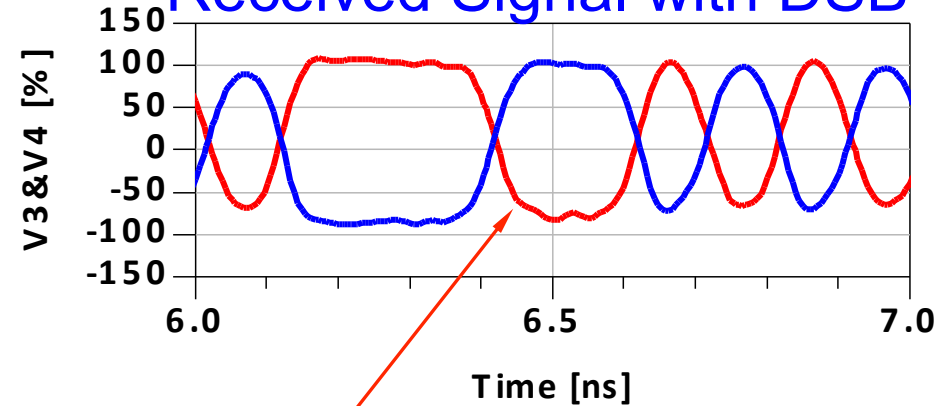

Noise Spectrum with DSB

Completely Removed

Received Signal with DSB

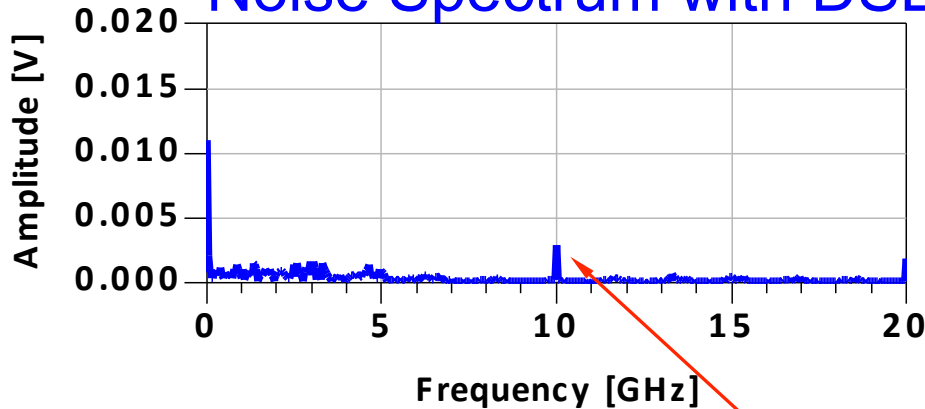

Well Balanced

3. Application Example : Insert DSB before Transmission Line

IP Core, 0.1 mm x 0.1 mm, Built into Die
Noise? Skew?

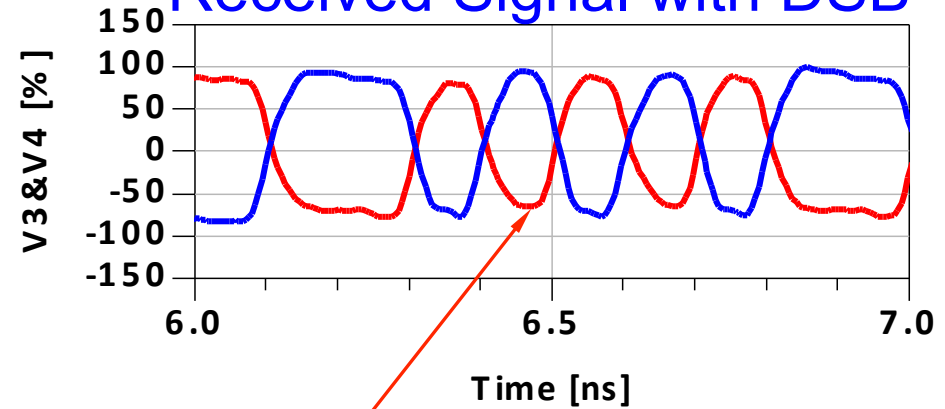

Noise Spectrum with DSB

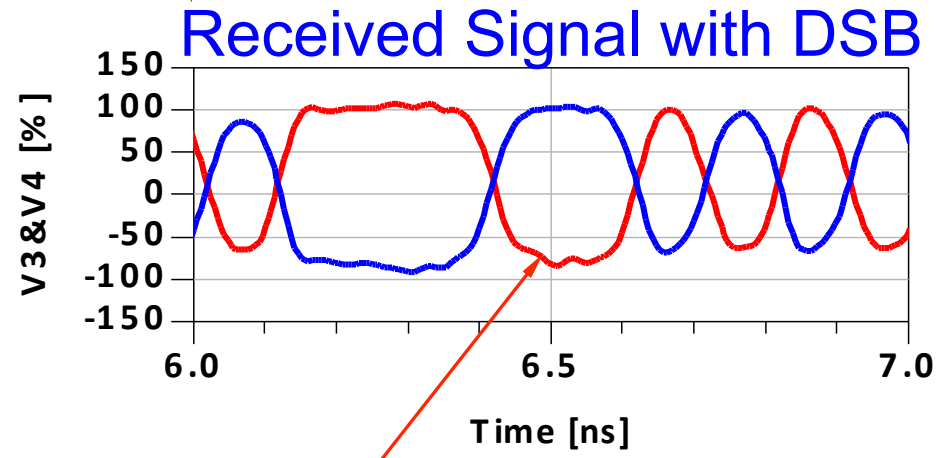

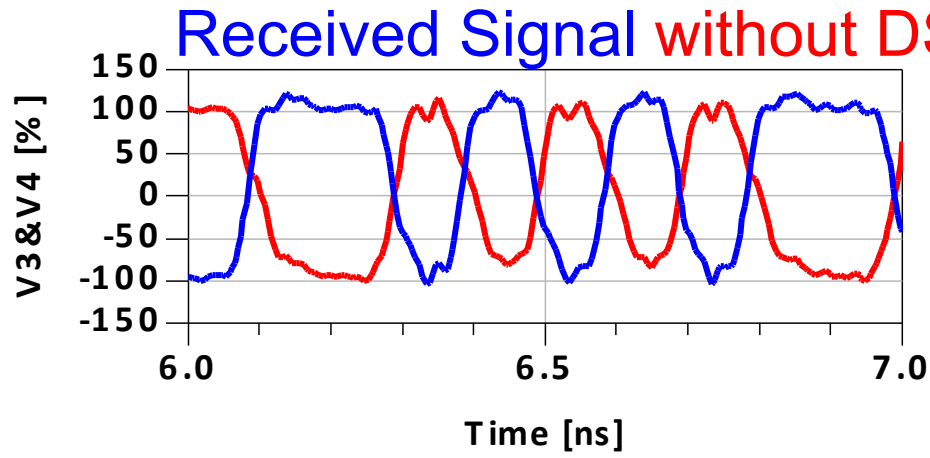

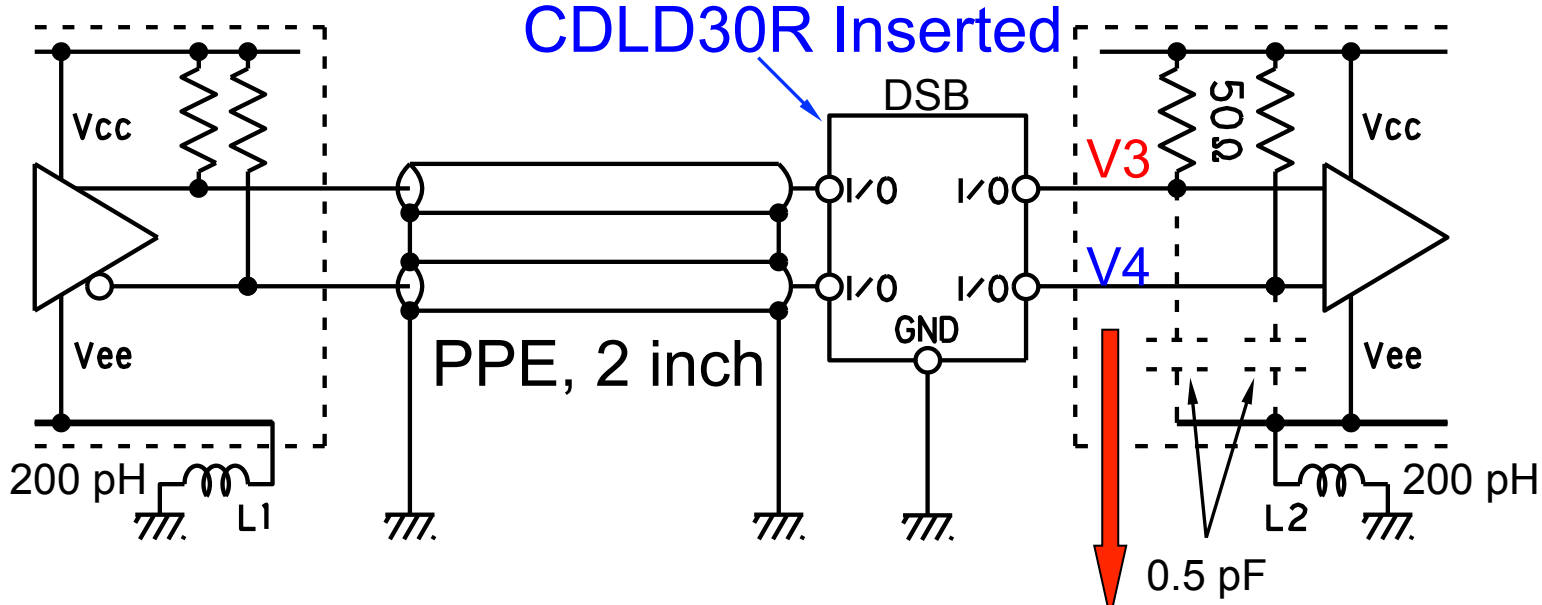

Enough Removed

Received Signal with DSB

Almost Balanced

4. Application Example : Insert DSB **after** Transmission Line Effective to remove unbalance in PCB

4. Application Example : Insert DSB **after** Transmission Line

IP Core, 0.1 mm x 0.1 mm, Built into Die

Received Signal **without** DSB

Received Signal **with** DSB

Balanced

4. Application Example : Insert DSB **after** Transmission Line

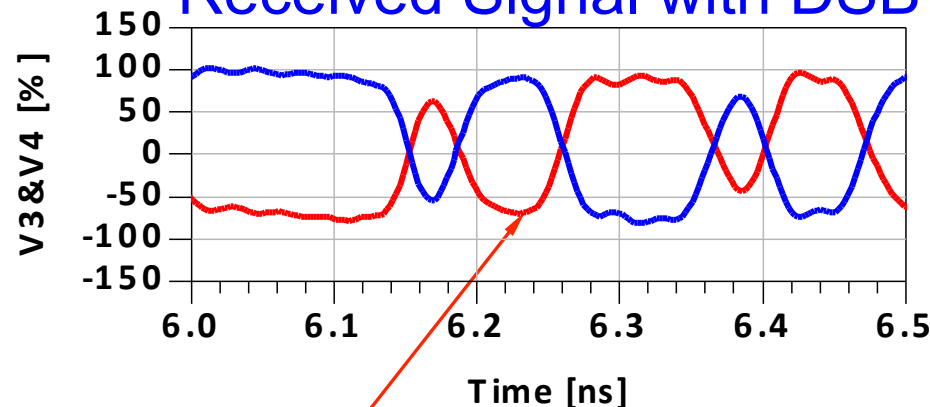

Unbalanced Signal, **28Gbit/s**, skew 8 ps, $t_r/t_f = 10 \text{ ps}/20 \text{ ps}$
IP Core, 0.1 mm x 0.1 mm, Built into Die

Received Signal without DSB

Received Signal with DSB

Almost Balanced

5. Conclusion

- (1) ELMEC Differential Signal Balancer (DSB) is very effective to remove skew, tr/tf difference for ultra high speed signals exceeding 10 G bit/s.
- (2) ELMEC Differential Signal Balancer (DSB) is available up to 28 Gbit/s ultra high speed transmission.
- (3) ELMEC is preparing *New DSB* by IP Core which is very small size 0.1 mm x 0.1 mm, and is easily built into silicon dies .

6. About us

【Established】 Feb. 1981

【President】 Masaaki Kameya

Business Career

CEO (@ ELMEC Corp. 2013–Now)

Research of Noise Absorber (@ Matsue ELMEC Corp. 2009–2013)

Research of LTCC Chip Delay Line (@ ELMEC Corp. 1998–2009)

Development of Production Machine (@ Matsue ELMEC Corp. 1992–1998)

Research of Traditional Delay Line (@ ELMEC Corp. 1988–1992)

Research of Semiconductor Laser (@ Mitsubishi Electric corp. 1985–1988)

Education : Tokyo Institute of Technology (Master degree)
